

NEVER Leave Your Dog in a Parked Car!

Did you know that on a **70°** day the temperature in a parked car can reach **120°** in *minutes*? Even opening windows or parking in the shade won't prevent a dog from getting overheated. The heat is especially hard on dogs because they can only cool themselves by panting and by sweating through their paws. With only hot air to breathe, dogs and other animals can suffer irreparable brain damage and even die of heatstroke.

Please Leave Your Dog Home!!!!
